-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 32-68 are pending. Claims 32-37, 59, and 63 have been amended in this communication filed 05/30/06 entered as Response After Non-Final Action (Miscellaneous Communication to Application 5/01/06) Claims 37-68 were added in the amendment of 12/15/05.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 32-36 and 63-66, drawn to a method and system for freight management and arranging for shipment of a load from a shipper by a carrier, classified in class 705, subclass 7.
 - II. Claims 37-62 and 67-68, drawn to a method of buying or selling a product with the product being a good or service, classified in class 705, subclass 37.
3. The inventions are distinct, each from the other because of the following reasons:
- Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed. The combination claims 32 and 63 are directed to a method and system for freight management and arranging for shipment of a load from a shipper by a carrier. The subcombination Group

Art Unit: 3693

II, claims 37-62 and 67-68 has separate utility such as buying or selling a product with the product being a good or service and making bids. The combination can be used in an environment where shipping a load by a carrier is used. For example, a shipment of crude oil or steel. The subcombination can be used in an internet auction where a product or service is bid on. For example, bidding on shares of Microsoft stock or a government contract to provide service to the Federal Government. Nothing in independent claim 37 mentions shipping or carriers or a plurality of loads as in claim 32 and claim 63.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and the search for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
